

How To Create Multiple Files And Directories Or Folder Use Only Single Command In Linux

```
mkdir {folder1,folder2}_{1,2,3,4,5} = 10
```

```
mkdir {ifolder1,folder2}_{1..10} =10
```

First step -

```
mkdir {jan,feb,mar}_2022/mkdir (str){jan,feb,mar}(str)
```

second step -

```
mkdir {jan,feb,mar}_2022/file{1..4}
```

```
touch {1..5}.text // touch file{1,2,3}.txt
```

```
touch {file1,file2}_{1..16}
```

```
touch {file1,file2}_{1..5}.php
```
